

System Requirements for CAFDEx® Applications

The hardware requirements below represent the minimum needed. The minimum recommended configurations need to be evaluated and adjusted according to your unique requirements. Disk space recommendations are for the product installation and working space only. The actual hard disk space that is required varies, depending upon your installation. The ITI professional services team will work with you to determine the appropriate hardware requirements for your specific environment.

You must set up both an application and database server. The application and database server can be hosted on the same server machine or for better performance on their own server machine.

Application Server Requirements

| | |
|------------------------------|--|
| Operating System | • Microsoft Windows Server 2003 |
| Hardware Requirements | • x86 (32-bit) or x86 (64-bit) system, with at least 1 - 4 process cores (based on CPU speed) • RAM: 4 GB or higher • Disk Space: 250 GB • Network Card |
| Web Browser | • Internet Explorer 6.0 SP2 or higher |
| Application Server | • Microsoft IIS 6.0 or higher |

Database Server Requirements

| | |
|------------------------------|--|
| Operating System | • Microsoft Windows Server 2003 |
| Hardware Requirements | • x86 (32-bit) or x86 (64-bit) system, with at least 2 - 4 process cores (based on CPU speed) • RAM: 8 GB or higher • Disk Space: 500 GB • Network Card |
| Web Browser | • Internet Explorer 6.0 SP2 or higher |
| Database Server | • Oracle 11g |

Application and Database Server Requirements

| | |
|------------------------------|---|
| Operating System | • Microsoft Windows Server 2003 |
| Hardware Requirements | • x86 (32-bit) or x86 (64-bit) system, with at least 2 - 4 process cores (based on CPU speed) • RAM: 10 GB or higher • Disk Space: 500 GB • Network Card |
| Web Browser | • Internet Explorer 6.0 SP2 or higher |
| Application Server | • Microsoft IIS 6.0 or higher |
| Database Server | • Oracle 11g |
